

**WORKING TOGETHER ON THE PATH
TO SALMON RECOVERY:
H-INTEGRATION AND ADAPTIVE
MANAGEMENT**

June 20th and 21st 2006 Workshop

9 a.m. to 4 p.m. both days

Edmonds Conference Center

201 Fourth Avenue North, Edmonds, WA 98020

Hatchery, Harvest, Habitat Integration &
Adaptive Management

Six steps to integration

STEP 3: AGREE UPON COMMON LONG-TERM GOALS AND SHORT-TERM OUTCOMES

Has your watershed defined measurable population outcomes that are agreed upon by representatives of all the H's for:

- Productivity/capacity?
- Abundance/escapement?
- Spawning grounds composition?

Has your watershed defined measurable community outcomes that are agreed upon by representatives of all the H's for:

- Numbers of harvestable fish?
- Land use (types and density of uses)?
- Water use (including user groups and quantities needed)?

If the answer to any of the above questions is no, what are the potential challenges to being able to define these desired outcomes?

What are some next steps you can take to help your watershed define agreed upon outcomes for each of these questions?
